

**Birla Institute of Technology & Science, Pilani**  
**Work Integrated Learning Programme (WILP) Division**  
**M.Tech Artificial Intelligence and Machine Learning**

## Plagiarism Policy

1. We encourage you to take the assignments seriously and submit only original work. Please note that plagiarism in assignments will be taken seriously. All assignment submissions will undergo plagiarism checks (both automated tools and manual checks).
2. If **any** team's plagiarism score exceeds **70%**, they would be awarded **zero**. (All the teams involved in the plagiarism will be awarded 0).
3. If a team is booked under plagiarism and awarded 0, no further discussions around it will be entertained.
4. With respect to the assignments of this course, Plagiarism *means*:
  - a. Copied partially/completely from *other* teams (Collusion)
  - b. Copied partially/completely from *any* internet sources without citing the source
  - c. You are not allowed to post the question on online platforms for help.
  - d. Usage of LLMs must be restricted to rephrasing or language edits. For any technical usage of LLMs, the complete prompt history must be downloaded and attached to the submission.
5. Protecting your work is the responsibility of the **team**. Also, do not post your solutions on GitHub or similar until the end of the semester.
6. You can take help from your classmates using **Gillian's Island rule**: "You are free to meet with fellow students(s) and discuss an assignment with them. Writing on a board or shared piece of paper during the meeting is acceptable; however, you should **not** take any written (electronic or otherwise) record away from the meeting. Everything that you derive from the collaboration should be in your head. After the meeting, engage in at least a half-hour of mind-numbing activity (like watching an episode of RoboCup) before starting the assignment. This will ensure that you are able to reconstruct what you learned from the meeting by yourself." If you have used this step, mention the registration number and the names of the students you met outside your group.
